Ref: DT/1284

PROJECT MANAGER

Client:

Global leader in the provision of tailored security and surveillance system solutions. For German HQ, we are now looking for a technically astute professional to enhance the Transport & Infrastructure division: integrated video and communications technology.

Location: Munich

Responsibilities:

- project/customer relationship management
- liaison with Sales re the migration from closed-sale status
- liaison with suppliers and Technology Centre
- coordination of developers and service technicians
- control of budgets and milestones
- resource planning
- management of change orders and claims
- execution of project reviews
- you report direct to the Country Manager

Requirements:

- graduate in electronics or a related discipline
- several years' experience of technical project team management in a technology-driven environment
- ideally experience of security solutions and with public authorities
- adept at project controlling: project calculations and costing
- a motivational leader with a strong client focus
- a conceptual thinker focused on optimal solutions
- a high degree of flexibility and initiative
- willing to travel
- very good English
- comfortable working within flat hierarchies
- able to influence and communicate effectively across multiple sectors
