CONSULTANT PROJECT MANAGEMENT

Client:

Frankfurt-based consultancy, providing business analysis and project management services to the financial services sector. We are now looking for an astute professional to further strengthen the organization.

Location: Frankfurt

Responsibilities:

- enhance the project management capability
- ensure project delivery in the fields of project and program management, project office, project methods and project governance
- provide project and program management skills to clients including initiating, scoping, planning, budgeting, risk and issues management, status reporting, delivering and handing over to support
- ensure all project documents are complete, accurate and appropriately stored
- cultivate a successful team working environment
- support sales efforts as required
- support business analysis activities especially in the project's initial phase

Requirements:

- a high-achieving graduate preferably in a relevant subject area
- minimum of 3 years' consulting experience within a medium/large organization
- minimum of 3 years' experience of project delivery within financial services
- investment banking experience desirable
- experience of project management disciplines desirable
- demonstrable experience of Systems Replacement/Migration Projects within front office trading environments
- project management qualification desirable
- broad experience of project standards, governance and methods preferably including project office establishment/methodology implementation
- excellent communication skills at a senior level
- strong analytical and problem-solving skills
- fluent in English and German
