SENIOR BUSINESS ANALYST RETAIL

Client:

One of the world's most successful e-commerce service providers. In order to strengthen the retail organization, we are now looking for a skilled professional to help enhance commercial performance at German HQ.

Location: Munich

Responsibilities:

- provide Retail and Finance with robust automated insight
- analyse very large datasets and dive below the surface to identify root cause
- drive reporting improvement and automation
- liaise with BI teams to understand appropriate architecture for reporting
- analyse current and historic performance
- provide analytical support eg evaluation of business proposals
- establish a development roadmap for future reporting needs
- deliver advanced SQL support and training
- improve the planning, closing and compliance processes
- participate in cross-functional projects
- act as Financial Analyst for one of the product lines

Requirements:

- university graduate in eg computer science, mathematics, statistics or finance
- prior experience in market research, analytics or finance preferred
- advanced SQL, database and BI experience
- basic understanding of finance: P&L, balance sheet etc
- experience of market and business analysis
- able to think laterally and solve ambiguous problems
- expert in Excel and other MS-Office applications
- exemplary verbal and written English skills - German an advantage
